Subject: Cleaning and Dismantling of Bulk Tanks

Dear Steve:

The attached letter is a request from Rollins for our approval of two subcontractors to be used in the cleaning and cutting of bulk liquid tanks at the Rose site. CSI has evaluated these subcontractors and finds them satisfactory for this work.

If you approve the use of these two companies for the stated work please indicate by signing in the space below.

Very truly yours,

Robin J. Robinson

Subject: Hydroblasting and Dismantling of Bulk Tanks,
Rose Chemical Site

We are requesting approval of the following subcontractors for activity related to cleaning (hydroblasting) and cutting (LaBonte Shear) of the bulk liquid tanks:

1. Plant Industrial Services, Inc.
P.O. Box 367
Zachary, LA 70791

Plant Industrial Services, Inc. has worked on numerous projects with RES and has in particular performed tank cleaning of PCB contamination. They are fully trained and equipped for tank entry and removal of sludge and other contaminants from the tank prior to cutting and removal or for reuse in other applications. They have an excellent record on safety and performance in accordance with all applicable federal, state, and local regulations.

2. Delta Resources, Inc.
P.O. Box 206
Boligee, AL 35443

Delta has a LaBonte shear which would be capable of cutting all tanks on site as well as cutting of the metal from the building. They are a firm which has supplied equipment and personnel to RES on other projects. All of their people are fully trained in safety, meeting all health background data, etc. We highly recommend the acceptance of Delta as a subcontractor. CWM has used this firm extensively.

Please advise me of your decision so we may plan accordingly.
